#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) Responsive to communication(s) filed on \_\_\_\_.  
 2a) This action is FINAL.                    2b) This action is non-final.  
 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## DETAILED ACTION

### ***Specification***

In page 1 section [01] the priority claim of U.S. patent Application should be updated.

### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claim 1 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 6,670,758 in view of U.S. Patent 6,114,807 to Kavanagh.

Regarding claim 1 both the instant application and U.S. Patent 6,670,758 claim a short arc lamp comprising ceramic body formed of beryllium oxide, reflector having axis of rotation and focal region, base including a main body portion having recess adapted to receive the second end of the ceramic body, window frame, disk shaped window, cathode, anode and means for redirecting substantially all of the infra-red energy

including a dichroic coating on the reflector and a filter coating on the window for preventing infra-red light energy exiting from the lamp.

Claim 1 differs from U.S. Patent 6,670,758 in that U.S. Patent 6,670,758 does not exemplify the second end of the base having surface area enhancements.

Kavanagh in analogous art of arc discharge lamp discloses (Fig. 8 column 12 lines 25-29) the base including surface enhancements (cooling fins) 123 which act as heat sink for conducting heat away from the lamp.

Therefore it would have been obvious to one of ordinary skill in the art at the time of invention to modify the second end of the base of U.S. Patent 6,670,758 include surface enhancements as suggested by Kavanagh for providing heat sink and hence conducting heat away from the lamp.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Patent 6,400,067 to Manning et al. discloses short arc discharge lamp with heat sink mounted on external surface proximate to arc gap.
